

Comb and Paper

Playing a comb and paper will let you feel the vibrations that make sound.

Materials:

- A comb
- A piece of paper

Fold your paper in half and place the comb inside.

or, cut your paper to the size of the comb and hold it against the comb.

You can find the instructions and tips for playing here:

<https://www.youtube.com/watch?v=CkGwVO6KuMI>

Wikipedia even has a page on Comb and Paper https://en.wikipedia.org/wiki/Comb_and_paper

Recorder Bagpipes

Materials:

- A plastic bag
- Recorders (the instructions call for 2 but you can just use 1)
- A straw, or the barrel of a pen
- Tape

You can find the instructions here:

<https://www.instructables.com/id/How-to-Make-Bagpipes-out-of-a-Garbage-Bag-and-Reco/> There is a video near the end of a person

playing their home made bagpipe. I'd recommend listening to the video below though for a better idea of how pretty it can sound.

www.instructables.com

And here's a video of how to make your bagpipes using the instructions above

<https://www.youtube.com/watch?v=PJVedrAOqhs> This video has some quite beautiful playing of this instrument near the end.

If you only have one recorder you should use it as the one that you work your fingers on. You could try using some other sort of tube or pipe as the drone pipe.
